

## Academic Fees of the Rikkyo University for Academic Year 2024

We sincerely thank you for your continued understanding and support of our education and research.

Tuition for the 2024 academic year for current students will not be revised and will be the same as the tuition for the 2023 academic year. Research membership fees for graduate school will no longer be collected, while some of the experiment and practical training fees and research membership fees will be revised. Please check the attached table.

(Please note that tuition for newly-enrolled students (new first-year student) for the 2024 academic year will be raised by ¥50,000.)

During the 2023 academic year, COVID-19 was reclassified as Class 5 in the Infectious Disease Law. We have focused on our response to infections during the past three years as a university, and we have finally be able to return to normal operations thanks to the above action. At the same time, we were also able to develop online and on-demand classes and we gained knowledge through our COVID-19 response. We hope to operate the university utilizing this knowledge as the occasion may arise.

Rikkyo University was founded in 1874 as a school practicing education based on Christian values and will be celebrating its 150th anniversary in 2024. Rikkyo University practices advanced research so that the students that gather here can study with pride and hold on to that pride after graduation. This research allows students to deepen their intellect, and it also allows the university to offer high-quality education to develop this intellect. The students are then able to contribute to an uncertain society in the future.

We look forward to your continued understanding and support.
